

Good Morning Guys:

All most a year ago I called into your program and we discussed roofing options for my house which was built in 1984 and had wood shakes. I thanked you for your thoughts and told you I would send before and after pictures. Well after a long process of getting the correct material match and then finding a talented installer, (i.e. not all roofing companies are created equal which was my homework), this project was completed a couple of weeks ago. I interviewed several roofing companies and went with Lyon's Roofing. The product we put on was the GAF Designer Series Stonewood and it turned out fantastic. The house looks comfortable and complete.

The project was expensive but I have in my possession a warranty from Lyon's along with a warranty from GAF which gives me piece of mind.

Lyon's Roofing is a very extensive company. They have their departments which work and coordinate beautifully and it is all about your project and making the customer 100% satisfied. That first day when they sent two tear off crews I knew I had picked the correct partner in this project. This company is a great referral on your list.

Thank You,
Linda
